

Mark –

I am the IT manager at Domtar Paper. We currently employ one of your students as an IT intern. The program lets us hire someone who has an interest in Information Technology and is studying in that field for full-time (or near full-time) work at the paper mill for a period of 19 months. It is a great opportunity to learn where your strengths are and if this is the right career field for the candidate. Typically we like to target students that can do the majority of their study remotely (online or at the Owensboro location). We require at least 30 hours per week at the mill and prefer 40.

We are currently looking for someone to fill the internship role, is willing to work and go to school and is interested in learning real world skills. Domtar pays very handsomely for interns – up to \$20 per hour and offers a housing stipend if the candidate lives further than 30 miles for the facility.

Please share this information with your students. Any interested candidate can reach out directly to me via email or my office number: 270-927-7230.

Thank you

Brad Moore, IT – Local Site Coordinator
